Özet

Hayvancılık, gıda ihtiyacımızın büyük kısmını karşılayan önemli bir endüstriyel faaliyettir. Ülkemizde ve dünyada gıda endüstrisinin en temel ham maddeleri olan et ve süt üretimi büyük ölçüde büyükbaş hayvancılık ile sağlanmaktadır. Ülke ekonomisi bakımından da büyük öneme sahip bu üretim kolunun geliştirilmesi öncelikli üretim hedeflerindendir. Süt sığırcılığında temel amaçlar hayvanların bireysel potansiyelinden en yüksek düzeyde yararlanmak, hastalıkların erken teşhis edilmesi, sağım, yem yeme, ağırlık, kızgınlık, tohumlama ve buzağılama verimlerinin yakından takip edilmesidir.

Bilgi teknolojileri alanında yaşanan neticesinde ortaya çıkan Endüstri 4.0 konsepti, üretim ortamında her bir verinin toplanmasına ve doğru bir şekilde izlenip analiz edilmesine olanak sağlayan güçlü bir konsept olarak tüm endüstrilerde olduğu gibi hayvancılık endüstrisinde de çeşitli değişimler sunmuştur. Bu amaçla yazılım ve donanım destekli modern sürü yönetim sistemleri işletmeler tarafından kullanılmaya başlanmıştır. Özellikle süt ineği yetiştiriciliğinde sürü yönetim sistemlerinden beklenen önemli kazanımların başında her ineğin biyolojik olarak en erken zaman aralığında gebe kalmasını sağlamak gelmektedir. Endüstriyel amaçlı yetiştirilen süt ineklerinde yılda en az bir defa döllemenin sağlanması, yavru almak ve süt verimi konusunda hayati öneme sahiptir. 28 günde bir tekrar eden bu hazır olma zamanında inekler kızgınlık denen rutin dışı davranışlar sergilerler ve bu durum 24 saat içerisinde gerçekleşip biter. Bu süre içerisinde ineğin döllenmeye hazır olduğu bir tepe noktası vardır ve bu ineğin döl tutmaya en müsait olduğu zamandır. Döllenme işlemi gerçekleştirilemeyen bir süt ineği ortalama 28 gün boyunca süt vermeden yem yemeye devam eder. Bu durum yavru alamamanın yanında üreticiye ek maliyetler getirir

Bu çalışmada Endüstri 4.0 sürecinde süt çiftliklerinde özellikle kızgınlık tespitinde kullanılan yöntemler ve teknolojiler araştırılmış, edinilen bilgiler ışığında yeni nesil Endüstri 4.0 uyumlu bir pedometre tasarımı gerçekleştirilmiş ve etkinliği test edilmiştir.
